Area Of Intrest

● HTML

● Python

Cources

● Python   January 2023 - March 2023
India, Pondicherry

Project

● Emotion Detection Using CNN

Human emotions are the mental state of feelings and are spontaneous. There is no clear connection between emotions and facial expressions and there is significant variability making facial recognition a challenging research area. Features like Histogram of Oriented Gradient (HOG) and Scale Invariant Feature Transform (SIFT) have been considered for pattern recognition.
